Clinical Correlations 2

Self-Reflection 3

Evaluation	Proficient (100%)	Developing (85%)	Minimum Performance (70%)	Unsatisfactory (0%)
Content & Focus (30%)	Clearly understands content, focused upon most relevant information. And uses best sources of evidence	Familiar with content, may not be appropriately focused or does not use best sources of evidence	Has some familiarity with content, but lacks focus on most important elements. Sources are tangentially relevant, but not on target	Unfamiliar with content required for participation.
Logic & Flow (30%)	Able to present an argument or topic in a logical and organized fashion.	Presents an argument or topic in a thorough way, but needs better logic or organization	Presents some aspects of topic well, but lacks logic or organization in other aspects	Disorganized presentation, not supporting point of view.
Analysis (30%)	Identifies relationships and components to clearly state opinions or ideas.	Identifies relationships and components, but lacks clarity in supporting opinions or ideas	Identifies some relationships and components, but lacks some important connections.	Does not identify components or relationships.
Communication/ Collaboration (10%)	Demonstrates good listening and reflecting skills and contributes appropriately	Listening or reflecting skills are good and contributes appropriately	Listening or reflecting skills are minimal and contributes only minimally	Does not contribute appropriately or lacks listening and reflecting skills

Our surgery-focused sessions challenged me to think much differently than other ClinCor sessions I've had, which I really enjoyed. Shifting my thought process to a more surgical/anatomically-based mindset took some work, but was rewarding in the way that it felt representative of all the things that I've learned in the past 16 months... and also how much that I have left to learn! I definitely felt familiar with the content and was satisfied that I came to the right conclusions most of the time, but the material doesn't come the easiest to me compared to other topics. I'm much more confident with it now than I was before these sessions. I have my surgery rotation in a month and I know that I will continue to improve on the critical thinking skills I developed over the past year.
